COURSEWORK

POSTGRADUATE

Data Structure and Algorithms
Operating Systems
Software Project Management
Computer Networks[Link]
Big Data Computing [Link]
Object Oriented Programming [Link]
Relational Database Management Systems
Web Application Development [Link]

UNDERGRADUATE

Big Data Analytics
Operating System Concepts
Principles of Web Programming
Network and Fundamentals
Essentials of Software Engineering

SKILLS

TECHNOLOGIES

Programming Languages:
Javascript • Java • HTML • CSS
Libraries/Frameworks:
TailwindCSS • Spring • Spring Boot • Rest APIs • Hibernate • Front-End
Databases:
MySQL • PSQl • Appwrite • Back-End

INTERESTS

Technical
Fullstack • Programming
Non-Technical
Content Creation • Video Editing

INTERNSHIP

KODNEST TECHNOLOGIES | FULL STACK DEVELOPER INTERN

Jun 2023 – Feb 2024 | Bangalore, India

- Focused on **Java & Python full stack development**.
- Collaborated with teams to enhance software solutions.
- **Agile methodology** to manage project tasks and ensure timely delivery.
- Explored programming, **web development**, **SQL**, **problem-solving**, and testing.
- Learned and applied automation testing tools and frameworks to streamline testing processes, increase efficiency, and improve test coverage.
- Gained practical experience in **web development**, including both **front-end** and **back-end** technologies, to build robust and interactive **web applications**.

WALMART | VIRTUAL SOFTWARE ENGINEERING INTERN

Feb 2024 – Mar 2024 | Remote

- **Advanced Data Structures:** Developed a novel heap **data structure** in Java for Walmart's shipping department, enabling **collaborative logistics operations**.
- **Software Architecture:** Designed a UML class diagram for a **data processor**, facilitating **collaborative** use across systems.
- **Relational Database Design:** Created an entity-relationship diagram for a new **database**, fulfilling all **requirements** for the pet department.
- **Data Munging:** Developed a **Python** script for efficient data population and management in the **database**.

PROJECTS

HEALTH-ALIGN: HEALTHCARE MANAGEMENT SYSTEM | LINK

- **Developed** a system to streamline patient data and appointments
- Administrative tools for scheduling, confirming, and cancelling appointments
- SMS notifications for updates
- Built with Next.js for efficiency.
- Followed the **Software Development Life Cycle** for project execution.

TUNE-HUB: MUSIC STREAMING PLATFORM | LINK

- Seamless and enjoyable music listening experience
- Listen to favourite songs
- Create new tracks
- Add songs to personal playlists
- Comprehensive music streaming functionality
- Focused on improving the user experience throughout **development** and **deployment** to ensure a seamless user experience.

CERTIFICATIONS

- Paper Presentation - **Energy Efficiency in Mobile Ad-Hoc Networks with Multipath Routing** [Link]
- Walmart USA - **Advanced Software Engineering Job Simulation - Virtual Internship** [Link]
- Java Full Stack Development [Link]
